Mitya Kurs

FULL-STACK TEAM LEAD

Full-stack developer and team lead with 14 years of experience shipping products, building resilient teams, and leveraging AI to accelerate delivery.
Recently designed, built, and launched a legal-tech platform entirely from scratch, utilizing AI-assisted development as a core engineering skill. Bringing a strong background in leading full-stack teams - decomposing monoliths, integrating complex systems, and mentoring engineers - I focus strictly on outcomes: an intuitive product, architecture that scales, and a cohesive team that knows exactly what it is building and why.

PROFESSIONAL EXPERIENCE

2025 2026

LawPDF, Independent Creator

Next.js | Node.js | AWS | AI

Built a platform allowing legal professionals and clients to gather case files and automatically generate referenced, summarized documents.

2023 2025

Clarity, tlv — Fullstack Team Lead

AWS | Serverless | Terraform | Vue.js | Node.js | Apollo | MongoDB

Ran technical design and delivery for the company's core product. Established architectural standards, managed the CI/CD pipeline, and ensured high availability and performance for high-traffic, business-critical features.

2018 2023

Daytwo, tlv — Fullstack Team Lead

GCP | AWS | CDK | React | Node.js | mySQL

Directed local and offshore engineering teams.
Scaled backend infrastructure to support high-throughput processing, enforcing strict security and compliance standards for handling sensitive international data.

2016 2018

Softwave, tlv — Fullstack Dev

Azure | Angular | React | Net Core | SQL

Shipped end-to-end features for enterprise clients, transitioning legacy systems to modern frontend frameworks and building out the supporting backend architecture and database schemas.

2015 2016

Eternity, tlv — Fullstack Dev

Azure | Javascript | HTML | CSS | ASP.Net | C# | SQL

Provisioned and maintained production cloud environments on Azure, handling deployment pipelines, server configurations, and operational monitoring for web applications.

2014 2015

Qpoint, tlv — Fullstack Dev

Javascript | HTML | CSS | ASP.Net | C# | SQL

Contributed to a highly structured enterprise codebase, focusing on writing testable code, conducting rigorous reviews, and maintaining strict engineering and version control standards.

2012 2014

Bynet, tlv — Fullstack Dev

Javascript | HTML | CSS | ASP.Net | C#

Developed foundational server-side and client-side logic for core applications, handling database design, API creation, and frontend integration.
